BEAUTEC BUSINESS PILOT[®]

TO PILOT PERFORMANCE
WITH A NEW EFFICIENCY

beautec**[®]**
THE TRUE VISION

From the era of classical and static reporting...

As a responsible manager and eloquent decision maker, you know that the days of short notice decisions are over. New business objectives, new international regulations, new transparency requirements...

More than ever, you have to "create more out of something much less".

But how?

How to find the best strategy?

How to guide and pilot and make better decisions?

How to control the implementation?

How to adjust and improve planning in real-time?

Particularly as you are already occupied with your day-to-day business.

In the end, what are the major factors that limit your business development?

Multiple dimensions,

> Lack of visibility?

Detached, fragmented, inconsistent information, whether operational or financial, doesn't provide a reliable and global view of the performance you aspire. In addition, the plans established by individual operational units cannot take into consideration interdisciplinary dependencies.

> Limited, partial control?

Information gathered from multiple sources, difficult to access and assess, has to be compiled in order to be analyzed, to find key-information, and to control critical alerts. Heavy work that leaves no space for rapid and continuous appreciation of assets and performance.

> Detached forecasts?

No integrated and unified reporting infrastructure, lack of consistency, fragmented information, slow to set up and even slower to use. The data you have is more oriented towards the past than towards the future.

It is impossible to use it as a basis for critical decision making and to conceive long-term strategies.

No doubt, the key to your future success lies in your information systems...

...leading to dynamic and instantaneous management!

As a real revolution in the field of high-performance and professional management, the **new Information Integration Technologies** combined with our **leading business vision** have created the "**BeauTec Business Pilot**".

Our solution today is able to gather all available data within a single, integrated and homogeneous architecture that is intuitively accessible and exploitable, still keeping your best-in-class specialised business applications.

No more gray zones, locked compartments, or forgotten sources... Because there is **only one single version of reality**, the various aspects of performance can be observed. On the basis of indisputable information, **future-proof strategies** with a high potential of efficiency can be developed to optimise your overall assets.

The operational and financial results can be permanently measured, analyzed, and compared with **your strategic objectives**. Informed in real-time of current developments, you can focus and adjust your options and manage your enterprise securely.

At one glance,

See it...

> To measure and analyze!

"**BeauTec Business Pilot**" allows gathering, integrating, and harmonizing all the important data from the various departments of your company, still leaving the source of the data at its origin. After analysis, this data is aggregated in order to form the **one and only truth** of your business reality. Based on this unique and shared platform, new creativity will arise within the different professions to serve the success of your activities.

Know it...

> To control and anticipate!

The same vision for everyone. Managers and employees benefit from the same consolidated measurements, facts, and indicators that are **visualized according to their specific needs**. Each person at his own level of responsibility is able to understand and improve the factors that optimize the performance.

Do it...

> To act and adjust!

All data and events are immediately taken into consideration as soon as they are created. Planning objectives and resulting execution can easily be analyzed, compared, and superposed in real-time and with simplicity. **Instantaneous reactivity**, necessary corrections and adjustments are done smoothly. New ideas, new scenarios, that will soon be translated into actions and performance.

...Plan and optimize your performance securely using "**BeauTec Business Pilot**".

All information is integrated, aggregated, and evaluated...

Heterogeneous, diverse in its function and professions, your organization is also in your information systems. Each department uses software specially designed for its specific business function.

Today, this eclectic approach is a major handicap to view your enterprise in a global and coherent manner.

How to conceive a strategy, control its execution, drive and reinforce the performance?

"**BeauTec Business Pilot**", a next generation solution developed by BeauTec, provides the ability to create a new transparency and new synergies within your company.

But how? By the use of elite technologies and our exceptional vision and methodology, "**BeauTec Business Pilot**" provides an instantly optimized integration of information unmatched in the market.

> "**BeauTec Business Pilot**" is the only solution jointly providing:

- > **Service Oriented Architecture (SOA)**
- > 100% "**open code**" solution
- > **Ultimate flexibility** to respond instantaneously to present and future developments and changes
- > **A data model** transparently handling different data frequencies and propagation
- > **Intelligent interfaces** importing the meta-data model of existing systems without persistently storing copies of your data
- > **An unlimited possibility** to define comparisons or KPI's together with instant notification
- > **Automatic update features**, executed in real-time and providing audit trail
- > **Integrated business model** separated from the technical data model
- > **Integration layer** separated from the presentation layer

> **Universal compatibility**

"**BeauTec Business Pilot**" is compatible with all standards systems and technical solutions available on the market and is based on industry leading proven technology.

> **Optimal security**

Each user has, depending on his role and responsibility, access to all levels of information just by "**Single Sign On**".

> **Essential flexibility**

Every enterprise changes and grows. Without the need of technical assistance, "**BeauTec Business Pilot**" adapts itself and enables **real-time "point and click"** adjustment of your business model for your entire organization, without the necessity to rewrite code.

> **Intuitive performance**

Information is immediately understood in its context, comparison of any type of data is possible. Providing requested information within seconds, the user is not limited in his research.

Depending on your infrastructure, the information can be visualized as client/server Windows™ application, web portal, java applet, web-part or ActiveX.

... in order to act with accuracy and efficiency!

> Accelerated decision-making cycle

With **"BeauTec Business Pilot"** the operations of planning, controlling, and reporting are no longer disconnected or altered over time. They happen jointly and simultaneously according to your unique business model with constant and continuous interaction and adjustment cycles.

"BeauTec Business Pilot" enables decision makers to translate their strategies into plans, and to control a plan's execution, to measure its performance, and to adjust its directions in respect to most recent results.

> Entirely shared objectives

With **"BeauTec Business Pilot"** all players and collaborators in the company have constant access to updated and validated information, to production and quality control evaluating their performance, to KPI's indicating deviations and alerts.

Conscious of and informed about global objectives, each individual can, at his level, execute the required adjustments in order to increase the degree of fit into a transparent shared strategy.

> Return of investment, rapid and lasting

Immediately operational, and immediately efficient as soon as installed, **"BeauTec Business Pilot"** is instantaneously of value. The realized projects guarantee a return of investment within months.

A concept open to evolution and mutation assures the continuity of our solution. Its efficiency, short-term as well as long-term, its adaptability and flexibility, its low maintenance cost, and its versatility make it the ideal integration solution for your business.

> BeauTec: A motivated and experienced partner
